SEO / AEO / GEO: Keyword research, search intent analysis, On-Page SEO, Off-Page SEO, Technical SEO, Local SEO fundamentals, metadata optimization, answer-focused content

Frontend: Next.js, React, React Native, Tailwind CSS, HTML5, CSS3, JavaScript

Backend & Databases: Python, Node.js, Express.js, FastAPI, MySQL, Supabase, Firebase, MongoDB, SQLite, REST APIs

AI & Development Tools: ChatGPT, Google Gemini, Claude, Lovable, prompt engineering, AI-assisted coding, code generation, debugging

Creative Tools: Canva, Runway, Kling AI, Pika, Luma Dream Machine, HeyGen, DALL·E, CapCut, Adobe Premiere Pro

SEO Tools: Google Search Console, Google Analytics 4, Google Keyword Planner, Ahrefs, Semrush, Screaming Frog, PageSpeed Insights

Professional Skills: Analytical thinking, problem-solving, creativity, communication, teamwork, adaptability, time management

Languages: English, Malayalam, Tamil

DIGITAL MARKETING & SEO EXPERIENCE

Practical Project Experience | SEO, AEO, GEO & AI-Powered Digital Marketing

- **SEO Keyword Research:** Identified relevant keyword opportunities, reviewed search intent, and organized primary and supporting keywords for website pages and business services.
- **On-Page SEO:** Applied SEO fundamentals across page titles, meta descriptions, heading hierarchy, keyword placement, internal links, image context, and URL structure.
- **Technical SEO:** Considered mobile responsiveness, page structure, performance, crawlability, and indexing requirements during website development.
- **Off-Page & Local SEO:** Developed familiarity with backlink approaches, local search visibility, location-based keywords, and Google Business Profile optimization principles.
- **AEO:** Structured information using clear headings, concise answers, and FAQ-style content to support answer-focused search experiences.
- **GEO:** Organized relevant, contextual website content to support discoverability and understanding across AI-powered search experiences.
- **AI Content Creation:** Used AI tools to support content planning, drafting, refinement, and website content workflows.
- **Website Implementation:** Applied SEO, AEO, and GEO content principles in project work for Green Arch Builders and Invendo AI Academy.

INTERNSHIPS & PROFESSIONAL TRAINING

Embedded Systems and Robotics Internship | Kochi | May 2023

- Gained foundational exposure to embedded systems, robotics concepts, and the relationship between software and hardware components.

Machine Learning Workshop — ICT Academy of Kerala | Trivandrum | July 2024

- Gained practical exposure to machine learning concepts, data analysis fundamentals, and model optimization.

Android Application Design and UI/UX Design Workshop | Kochi | May 2025 – June 2025

- Learned Android application design principles, mobile interface concepts, user-friendly layouts, and UI/UX fundamentals.

SELECTED PROJECTS

Green Arch Builders — Business Website

Technologies: Next.js, Tailwind CSS, JavaScript, Supabase

- Developed a responsive business website organizing construction and architecture services and project information.
- Applied keyword-focused service content, metadata, headings, internal linking, and mobile-friendly structure.

Invendo AI Academy — Corporate AI Training Website

Technologies: Next.js, Tailwind CSS, JavaScript

- Planned website structure and content using keyword research and search intent.
- Organized service content and FAQs using SEO, AEO, and GEO principles.

Personal Portfolio Website

Technologies: React, HTML5, CSS3, JavaScript, Supabase

- Created a responsive portfolio presenting technical skills, projects, and professional profile.

TECHNICAL PROJECTS — CONTINUED

Highway FR Detection Web Application

Technologies: Python, FastAPI, React, YOLO, OpenCV, SQLite, REST API

- Built a web application concept for video upload and automated video analysis using computer vision.
- Used YOLO for vehicle/person detection and OpenCV for frame processing and annotated video output.
- Implemented face detection and snapshot extraction, with FastAPI endpoints for uploads, processing jobs, and results.
- Stored metadata, timestamps, and file paths with SQLite and local storage; displayed processed videos and snapshots in the web interface.

RationKart — Public Distribution System Application

Technologies: React Native, JavaScript, Firebase

- Worked on a mobile application concept covering ration booking, stock management, and doorstep delivery workflows.
- Explored Firebase authentication and application workflows for customer and delivery-related operations.

AI-Based Question Paper Generation Web Application

Technologies: React, Node.js, Express.js, MongoDB, OpenAI / AI-NLP

- Designed an AI-assisted workflow to generate questions from study materials by subject, topic, marks, difficulty, and question type.
- Organized a reusable question bank and paper assembly flow with backend processing and a user-friendly interface.

Salon Form Web Application

Technologies: Next.js, Tailwind CSS, Backend Integration

- Developed a responsive salon form for collecting and submitting salon-related information.
- Designed a clean interface focused on form usability and consistent experience across devices.

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering

Younus College of Engineering and Technology, Kollam, Kerala | 2022–2026

Higher Secondary Education (12th Grade)

Government Model H.S.S., Vettikavala P.O., Kottarakkara, Kerala | 2020–2022

SSLC (10th Grade)

St. Mary's HSS, Kizhakkekara, Kottarakkara, Kerala | 2019–2020

PROFESSIONAL OBJECTIVE

To contribute to an organization as an AI Digital Marketing Specialist by applying SEO, AEO, GEO, keyword research, AI-powered content creation, and website development skills. Interested in improving digital visibility, building search-friendly web experiences, and supporting business growth through modern digital marketing strategies.
